How do I add a new page to my site?

When you create a new site, a navigation menu with an index page and contact-us page is automatically generated. To add additional pages to the navigation, follow these steps:

1. In the Sitebuilder, click on the "Page" tab and click on the green "+" (located next to the pencil) OR hover over your current navigation menu > Add Page.
2. A dialog box will open up asking you to name your new page, (and give you the chance to change the page heading, and decide whether or not to include the new page in your navigation).
3. When you click "OK", a new page will be created and a link will automatically be added to your navigation.
