How can I wrap a picture and text?

You can place an image and text side by side as follows:

1. Add a Text Widget to your page.
2. Click "Picture" button (the icon that looks like a green tree in a picture frame, roughly in the middle of the toolbar) on the Text Editing Toolbar.
3. A dialog box will open up and allow you to browse for and select an image.
4. Once you have added your image to your page, select it by clicking on it.
5. You will then see three new buttons on your Text Editing Toolbar: a picture with text below (No Wrap), text on the right (Wrap Left) and text on the left (Wrap Right).
6. Select the option that suits you and start typing. Your text will then wrap around the image
