How do I change the background of my site?

To change the background of your site, either the color or by adding a background image, we would suggest that you use the Style Designer feature. This will allow any changes you make to be site-wide; it will keep your site looking clean and consistent.

To change the background color of your site:

1. Click on Style > Style Settings > Style Designer.
2. In the “Colors” section select “Background Image.”
3. You can choose an image by clicking on the little “Edit” button.
4. You can change the background to a solid color by clicking on the “Foreground Color”, and choosing a color for the palette or entering your own HEX number.
5. Click “Save.”
