How do I add meta data for SEO to my site?

We have made it very easy to add meta data to your site including the title, description and keywords meta tags for each page.

To do this:

1. Make sure you are on the page you want to add the metatags to.
2. Click on Page > Page Properties > Metadata.
3. You will be able to add the meta data for each here.
4. Click “Ok.”
5. Do this for each page of your site.
