Install Dolphin, Orca, and Ray widgets.

To install Dolphin, Orca and Ray Widgets use the link in your cPanel for Software > Site Software > Dolphin.

This will install all 3 components from Boonex.

If you are running a shared hosting account and want to use the Ray Widgets that require Ray Media Server then you can use the shared RMS from Boonex.

If you would like a dedicated RMS we can install this for you on one of our managed dedicated server hosting packages.
