Fix ApacheBooster in WHM - 500 Internal Server Error

If your ApacheBooster (Nginx and Varnish plugin for WHM) is throwing a 500 Internal Server Error, this is a simple fix which may help you.

Go to **Check/Repair a Perl Script** in WHM

Put this path in the field which appears:

```
/usr/local/cpanel/whostmgr/docroot/cgi/addon_nginx.cgi
```

Next, click the "**CHECK**" button and the problem should be resolved.
