How do I add a blog to my site? (Tumblr)

There is not a blogging feature built into the Sitebuilder, however we are integrated with Tumblr so if you have an account there, or want to set one up, you can blog using this blogging platform.

To use the Tumblr Widget:

1. Click on Widgets > Media.
2. Drag and drop the Tumblr Widget onto your page.
3. Sign in using your Tumblr credentials. If you don't have a Tumblr account, you can sign up via the Tumblr Widget in two easy steps.

Once you enter in your Tumblr feed name into the field and click OK, your Tumblr blog will be seamlessly integrated into your website. You will still need to make changes/additions to your blog from Tumblr, but the changes/additions you make there will transfer to your website.
